

# BASF Days China

## 26. – 28.10.2015

### Concept

**BASF Days "China"** from 26-28th October 2015 represents an exclusive in-house event to which we invite **30 selected graduate students, PhDs and post-docs from Europe** with a focus on material science/polymer chemistry or catalysis/organic synthesis or chemical, process or mechanical engineering to our company headquarters in Ludwigshafen. Students should be either Asian nationality or have Asia as specifically desired job location.

During these three days, the students get to know not only BASF as company and employer, but also learn about research activities and entry & career opportunities in the field of R&D as chemist or engineer, especially in our Chinese research centers.

An interesting mix of lectures, discussions, and site/lab visits awaits the students as well as a variety of opportunities to talk to specialists and managers from research.

A site tour and a guided tour of the visitors center round off the event.

**The event & talks will be held in English.**

### Target Group

**Chemistry** PhDs and Post-Docs with focus on Materials Science, Polymers or Catalysis and Master and PhDs students of chemical, process or mechanical **engineering**

- Fluent English skills
- Very good academic performance
- Analytical and strategic skills
- Ideally, extracurricular activities
- Ideally some experience through internships abroad, semester abroad etc.
- **Asian nationality or strong desire to live and work in Asia after finishing studies**
- registered at an European university

### Re-Imbursement

The costs for accommodation and travelling (Equivalent to travelling by train 2<sup>nd</sup> class) will be reimbursed by BASF.

### Application

Please send your application with **CV** and **motivational letter** until September 25th 2015 to [franca.tiarks@basf.com](mailto:franca.tiarks@basf.com). The selected participants will be informed shortly after the deadline and receive further information.
